

# CONSTRUCTIONLINE NEW FEATURES

New features as of 19/08/10:

## 1. The Opportunities Notice Board

You will notice that the Constructionline Opportunities Notice Board link has moved from the services box, to the top left hand side of the screen for added prominence.

If you do not have access to this service, please contact your local [Client Relationship Manager](#).

## 2. Run a Supplier List

Following buyer requests, we have changed the search function on the Run a Supplier List sector and categories screen. A new added drop-down box will allow you to search for a supplier with a notation value lower or higher than the approximate cost of your contract. And, if you prefer the old method simply select the 'Advanced' link where you will be able to

add upper and lower values as before.

Run a supplier list | **Sectors and categories** | Location of work | Branch office | Other | Review
