

MERRYHILL ENVIROTEC LTD

> ABOUT MERRYHILL ENVIROTEC LTD . . .

Merryhill Envirotec Ltd is a licensed contractor specialising in asbestos management, cleaning and decontamination services and disaster recovery.

Established in 1977, Merryhill operates from headquarters near Southampton and with regional operations centres in Bristol and Birmingham.

> INCREASED BUSINESS RELATIONSHIPS . . .

Merryhill joined Constructionline 5 years ago to avoid missing out on vital public sector business and ensure they were included on key tender lists.

Paul Fox, Director of Business Development, recognised that a further benefit of joining Constructionline is creating relationships with other businesses. He explains, 'Constructionline has provided access to new companies for our supply chain, and reduced time in competing for certain public sector contracts. The contractors we have used so far have all been excellent'.

> TIME SAVING . . .

Apart from the benefit of gaining vital business, Paul Fox also recognised that Constructionline saves large amounts of time, 'The system saves 100 hours of my time over a year. A fortnight is a lot of time to do other things.'

Merryhill has now registered with Constructionline both as a buyer and a supplier. Using the system for free as a buyer allows Merryhill Envirotec to narrow down potential sub-contractors by a range of criteria before contacting them, which is especially useful when working in areas of the country far from their base.

For more information on Merryhill please visit their website at <http://www.merryhillenvirotec.com/> or call 01794 515848.
