

CONCRETE REPAIRS LTD

> INDUSTRY LEADERS . . .

Concrete Repairs Limited was established in 1955 and is today widely recognised in the UK construction industry as the leading contractor for the investigation, refurbishment, strengthening and repair of reinforced concrete structures and buildings. The business has grown organically over recent years to a position where it is able to offer a nationwide service via a network of regional offices across the UK. The company has a turnover in excess of £20m per annum and is wholly owned by the management team. All employees are directly employed by the company and its training matrix ensures that all are fully qualified to undertake their duties to the high standards, which the business requires.

The company applied for the Constructionline accreditation soon after the service was established and has been accredited ever since. John Drewett, Marketing Director at Concrete Repairs remembers those early days. 'We were first prompted to join Constructionline by our clients who were beginning to utilise Constructionline more and more for the selection of the contractors they use. We have now worked with Constructionline long enough to say that we would definitely recommend them to other companies. We have always found the support from the Constructionline customer service team at a high level, very helpful and a useful source of information'.

> SAVING THEIR PENNIES . . .

The construction industry is a very challenging environment to work in and demands firms to ensure they provide not only the best possible service delivered to the highest standards, but also secure the welfare and wellbeing of both their site workers and the public. So establishing their reputation is one of the main things, and John has found Constructionline to be a great aid in achieving this. He explains, 'The Constructionline accreditation has strengthened the image of our brand and we find it to be a huge asset to our business'.

Apart from bringing in new business opportunities, the Constructionline registration helps the company achieve savings by reducing the amount of administrative forms they need to complete. John explains 'There are well over 500 councils plus numerous public and commercial organisations using Constructionline. By using Constructionline, we have saved a considerable amount of time in completing and managing approved listings. Financially, this amounts to savings of £50,000 per annum in administration costs'.

// COMPANY PROFILE
