

KDC CONTRACTORS LIMITED

> ACHIEVING THE STANDARD . . .

KDC Contractors Limited was established in 1990. They work nationwide and provide a range of services, including specialised demolition and dismantling, asbestos removal, concrete cutting using diamond rope saw, and site remediation incorporating our in-house company K-Land Solutions Limited. They have been registered with Constructionline since 2001.

Peter Gilligan, Business Development Manager at the company remembers their original reasons for applying to become Constructionline accredited, 'It was a stipulation of clients that we were members of Constructionline. We passed the accreditation process and in that way ensured that we continue to meet our clients' criteria'.

> REMAINING CONFIDENT . . .

The construction industry has continued developing and opening new opportunities or growth for businesses like KDC. However, with the ever increasing number of new laws and regulations, construction pre-qualification can sometimes be a daunting process. By remaining accredited by Constructionline, Peter can rest assured that his company is up to date with the industry developments without the need to complete endless numbers of questionnaires. He explains, 'Our Constructionline accreditation is of great value to us. On average, by being accredited by Constructionline we save approximately 40 hours per month time spent in completing questionnaires and attending meetings. In addition, the knowledge, support and general helpfulness of the Constructionline team has always been very good and of high standard. I would certainly recommend them to other companies trying to achieve similar benefits'.
