

# Changes to *all* memberships in the new platform

- ✓ We've renamed some sections of the PQQ to align with the Common Assessment Standard. (e.g. The C1 - Company Details is now called Identity).
- ✓ In the PQQ, we have removed the Separate L3 Supplementary Questions section and added in the requirements in the relevant standards e.g. Enhanced Company Details is no longer in Identity (this is not applicable for Silver or Bronze).
- ✓ In our Bronze membership we've removed the following sections from the PQQ: Related Companies, Health and Safety General and Corporate and Professional Standing. We have added in Branch Office on the PQQ.
- ✓ Add your own financial details and we verify the data (please note the data is still only visible to ourselves and your organisation).
- ✓ We now have auto-verification of your work categories as we've removed the need for uploading any references.
- ✓ Work category and Compliance status are now visible from the same screen on your dashboard.
- ✓ An SSIP has now been bundled in with all membership levels. Our bundle can save you up to 40% from separate assessments and you also have the added benefit of having your SSIP and PQQ all in one place.
- ✓ A visual icon will appear when a requirement requires attention (e.g. Expired icon).
- ✓ We've simplified verification statuses to now be: *Verified* or *Not Verified*.
- ✓ Better management of your user permissions – create your users and deactivate users that have left the company.
- ✓ From one dashboard, you can now see what upgrades and bolt-ons are available to you and how much it will cost at any time in your membership life cycle to add these on.
