

# Constructionline

Bronze Member

## Changes to your *Bronze* membership in the new platform

- ✓ We've renamed some sections of the PQQ to align with the Common Assessment Standard. (e.g. The C1 - Company Details is now called Identity).

---

- ✓ In our Bronze membership we've removed the following sections from the PQQ:
  - Related Companies
  - Health and Safety General
  - Corporate and Professional Standing

---

- ✓ In our Bronze membership we've added the following section Branch Office to the PQQ.

---

- ✓ Add your own financial details and we verify the data (please note the data is still only visible to ourselves and your organisation).

---

- ✓ We now have auto-verification of your work categories as we've removed the need for uploading any references.

---

- ✓ Work category and Compliance status are now visible from the same screen on your dashboard.

---

- ✓ An SSIP has now been bundled in with all membership levels. Our bundle can save you up to 40% from separate assessments and you also have the added benefit of having your SSIP and PQQ all in one place.

---

- ✓ A visual icon will appear when a requirement requires attention (e.g Expired icon).

---

- ✓ We've simplified verification statuses to now be: *Verified* or *Not Verified*.

---

- ✓ Better management of your user permissions – create your users and deactivate users that have left the company.

---

- ✓ From one dashboard, you can now see what upgrades and bolt-ons are available to you and how much it will cost at any time in your membership life cycle to add these on.
